

## **2-weeks task to be completed for site**

**\* Front Live site \*** Functional pages required.

**\*\*\* Please add the currency sign \$\$ instead of \$ to all prices.\*\*\***

### **1. HOMEPAGE**

#### *Top section*

- Main rotating image? what is going on here? I have not seen any updates on backend and front end. (img size **720x480**)

- be able to show **at least 5** rotating images at controlled speed, text and clickable url links

#### *Middle section*

- what is going on here? I need updates here.

#### *Bottom section*

- please look into the alignment and relative images width at **300x225**

#### **Others:**

> Search button to be fully functional?

> Login page to be fully functional and tested.

> Get Informed mailing list to be functional?

> Pay online using ..... please allow editable for my side.

> Social media links to be live and running, editable on backend as well. (*Facebook, Twitter, Skype, Yahoo messenger only*)

### **2. ALL BRANDS pages**

- rotating image sizes **480 x 360**

- slow down speed of rotation

#### *Collections section*

- thumbnail images size **150x150**

- if more than 10 collections, change to sliding-style? I am waiting for updates here.

### **3. Collections page**

- rotating images sizes **480 x 360**

- slow down speed of rotation
- thumbnail images size **150x150**
- **align thumbnail watch models properly**

### **3. Watch Model pages**

- rotating image sizes **480 x 360**
- slow down speed of rotation
- thumbnail image size **150x150**
- **product name to appear under each thumbnail images.**
- **please align tool products properly under Tools main page**

- \*Each product page to**
- remove share button
  - remove FB comment page

## 7. Contact Us Page.

**Please have this ready. upload something for me to edit as well.**

## **8. Gallery page**

Need your suggestion input for nice layout of Gallery page as well as for backend work.

\* Ideally features include pop-up images.

\* any thumbnails should be 200x200 or 250x250

**OR USE SLIDESHOWPRO GALLERY as I have mentioned to you before many times.**

## **9. Other features.**

**> Consistent color background for entire website on all pages**

**> Editing page Header and URL text?**
